

VARIO 3/4" adapter

Impact wrench/driver-compatible VARIO adapter turns the impact wrench/driver into a tapper, thereby adding a whole new tool to the range of applications. For all impact wrench/drivers with a 3/4" square head tool mounting. |The FEIN VARIO consumable can be easily changed without the need for tools and can be conveniently inserted without actuating the locking sleeve. Suited to all FEIN VARIO accessories – twist drills, countersinks and tappers. Simple and mechanical tapping of threads up to M30. |Up to M18, we recommend the FEIN VARIO 1/2" adapter with a smaller tool for more sensitive work and less risk of consumable breakage. Unlike a drill/driver or manual tool, the impact wrench/driver provides an easier and more powerful way of tapping and cleaning threads. |The adapter can be fitted with ease and secured for permanent use with the aid of a locking spring or circlip.
