Details

- Extremely small and light for working in tight and difficult-to-reach spots – including vertically and overhead – thanks to height of 169 mm, a length of 290 mm and a weight of 8.5 kg.
- Extremely low wear and long-life tool design with spindle sleeve feed without clearance for accurate drilling results in tough use in industry and manual trades.
- Very powerful and maintenance-free brushless 1200 W high-power motor with high speed stability for continuously fast work progress as well as forward / reverse running and electronic speed setting for all drilling applications, such as core drilling, twist drilling and tapping and countersinking.

- HSS SPECIAL 25 core drill bit: Thanks to its special cutting geometry, the core is cut from the inside out and materials of multiple layers can therefore be drilled in a single process.
- Hole diameters and consumables: Always have key accessories to hand, everything from the most common drill bit diameters to cutting paste for cooling lubrication.
- L-BOXX system: Keep things stowed clearly, tidily and safely. Thanks to the tray for small parts, there is room for all accessories and the L-BOXXs can also be joined together and stacked with ease.
