PRESS RELEASE

Schwäbisch Gmünd, 25 May 2026

FEIN adds titanium-coated bimetal saw blades and new sets to MultiMaster portfolio

By extending the range of accessories available, on 1 May 2026, FEIN is launching a further eight titanium-coated bimetal saw blades for the MultiMaster. Together with the TiN saw blades introduced back in 2025, the range now includes ten powerful blades, developed for very high levels of precision, maximum durability and professional results in a whole host of different materials.

4x longer service life thanks to TiN coating

All new saw blades are made from highgrade bimetal and finished with a TiN coating. This reduces the amount of heat produced and ensures outstanding levels of resistance to wear. In turn, this extends the service life fourfold over standard HCS saw blades – even during challenging applications or when making contact with nails in wood.

Universal use – for metal, wood and many other materials

4 saw blades with universal teeth

For sheet metals up to 2 mm, aluminium profiles, copper pipes, wood, plasterboard, plastics

The corrugated universal teeth enable precise cuts in a whole host of different materials – ideal for renovations, interior work and repairs.

6 saw blades with wooden teeth

For wood, plasterboard, plastics

With set wooden teeth, designed for rapid work progress, clean cut edges and universal applications in interior work.

Ideal for the FEIN MultiMaster – enhanced for professionals and craftsmen

By now providing a total of ten titanium-coated bimetal saw blades, FEIN offers a complete range for the most diverse of requirements – from metalworking and interior work to renovations.

Two new MultiMaster sets: now with huge range of accessories.

At the same time as extending its range, FEIN is also launching two new, particularly extensive MultiMaster sets, which are optimised for anyone needing maximum performance and a huge range of accessories.

MM 700 MAX SELECTION

The most powerful FEIN multitool for very high speeds and maximum work progress in interior work and renovation – comes with 61 accessories.

Ideal for:

- Sawing in wood, metal and plastics
- Cutting out tiles
- Cutting silicone joints, carpets & flexible materials
- Removing adhesive residue
- Removing tile adhesive

The MM 700 MAX Selection is the number one choice for professionals not wanting to compromise when it comes to efficiency and range of accessories.

MM 500 PLUS SELECTION

The versatile multitool for rapid work progress in interior work and renovation – comes with 55 accessories.

Ideal for:

- Sawing
- Grinding
- Cutting out tiles
- A very wide range of interior work tasks

The MM 500 PLUS Selection delivers good value for money and is ideal for craftsmen, renovators and do-it-yourself enthusiasts.

The brand

Since its beginnings in 1867, FEIN has had one mission: to be the preferred partner for power tools in the metal processing industry and manual trades. Founded in Stuttgart by Wilhelm-Emil and his brother Carl Fein, C. & E. Fein GmbH is now in its third generation of family ownership and is globally recognised as a manufacturer of high-quality, durable power tools made in Germany. The company manufactures a wide range of power tools, consumables and accessories at its state-of-the-art production facility in Bargau, Baden-Württemberg. FEIN's vision is to become the global leader in performance within the power tools market for metalworking. With nearly 900 employees across Germany, Europe, North America and Asia, the brand has a worldwide presence.
